

# CLIMATE ACTION WORKSHOPS

## Climate Change is the #1 threat to your business<sup>1</sup>

Raoul Empey was personally trained by former U.S. Vice President Al Gore to deliver the Climate Reality presentation, which is an up-to-date version of the Oscar-winning documentary 'An Inconvenient Truth'. It offers a highly visual and global perspective of the climate crisis packed with emotive imagery. Raoul adds his own perspective on the specific challenges and opportunities for Ireland.

These workshops will be of value to organisations wishing to frame larger sustainability projects, engage staff, generate ideas, or reduce the risks and exposure from a changing climate to your business.

*"The feedback has been universally positive ... It was very, very enjoyable and informative."* Pat Neville, Regulatory Affairs Manager, **Coillte Forest**

### BENEFITS 100% POSITIVE FEEDBACK RECORD

## Feedback

*“Once more thanks for the presentation ... it is vitally important that we provide different perspectives on the subject and to actually stimulate discussion internally. And that you did in spades. The Q+A and got people thinking about the discussions went on into lunch.”*

Tom Halpin, Head of Information, **Sustainable Energy Authority of Ireland**

*“I was particularly keen to let you know how well received your presentation was. It created a lot of discussion in the days that followed and it really helped to raise the profile of the climate change challenge amongst a wider group in the Department.”*

Denise Keoghan, Climate Change Unit, **Department of Transport, Tourism & Sport**

*“We have had a great reaction from our employees and generated loads of ideas for the challenge which was the objective.”*

Sandy Boundy, Corporate Relations Communications & CSR Manager, **Heineken Ireland**

*“Should be compulsory for every Councillor & staff member to attend this!”*

Attendee, **Meath County Council**

## About Us

Our vision is to leave our planet in the same or better condition than we found it in, so that the next generation can enjoy the same lifestyle we have become accustomed to. *Sustineo* is the Latin for ‘I sustain’, and we believe in the power of the individual to effect change in business, the community and at home.

Sustineo specialises in low carbon projects and the quantification of sustainability through numbers using techniques such as life cycle assessment (LCA), measurement & verification of energy savings and carbon footprinting. All our projects are about saving energy, reducing greenhouse gas emissions or raising environmental awareness.

As independent advisors, Sustineo excels in tackling original problems with creativity and enthusiasm. A list of projects illustrating the type of innovative work we are involved with can be found on our website’s [project page](#).

Sustineo, Block 4, Regus Harcourt Centre, Harcourt Road, Dublin 2
